# The Intelligencer. NATIONAL BANKS.

THE President has nominated ex-Secretary Evarts and Senators Alison and Thurman to represent the United States in the International Monetary Conference, and they were confirmed by the Senate.

The London World's last "Celebrity at Home" article describes President Gar-field, and makes some very complimentary Hanks is a Pix.

In short, business is intocity position for the present. The President and Sectretaries Blaine and Windom have finally been brought to darvan extra session of Congress, and unless something devolves to change the present status, an extra session will be called about the middle of May.

The existence of hog cholers in the United States bonds in the British Consul at Philadelphia to the British Consul at Philadelphia to the House is present to the present status, an extra session of Congress, and unless something devolves to change the present status, an extra session will be called about the middle of May.

The Republicans can then get control of the House, and very probably the Sentence of hog cholers in the British Consul at Philadelphia to the House is present. It appears upon investigation of the subject that similar reports have been circulated throughout other foreign countries to which American pork is exported. the first time, the Democratic party, which is fond of parading itself as the friend of free schools, refused to do an act of justice to the fund sacredly set apart by constitutional provision for the education of the children of the State; and not only does that party, with these professions fresh on its lips, refuse to pay the interest it justly owes to the School Fund, but it narsistantly refuses to make any pretense of providing for the payment of a cent of the principal of a debt contracted in the teeth of the Constitutional probi-

For if it does not, whence does it expect to get the money to meet the increasing expenses of the State as shown in the appropriation bills now. pending in the Senate and which have

passed the House? Where is the fifty thousand dollar appropriation for the State House at Charleston (which State House, by the way, is not to be used for four years yet) to come from, if another raid on the School Fund

is not contemplated? And leaving this \$50,000 out of consideration, the appropriations already made by the House overrun the Auditor's estimated receipts for the current fiscal year more than fifty thousand dollars,

But if the appropriation of \$50,000 for the Charleston Capitol is ; made, the total amount of the appropriations will exceed the estimated receipts of the present year by over one hundred thousand dollars; and yet the State is in debt, for interest and principal, one hundred and thirty ussad dollars already! How will the account stand next year?

The school Fund in the Senate.
The subject of the indebtedness of the State to the School Fund was under debate in the Senate again yesterday. A scarraph in the general appropriation are supported to the school fund was under debate in the Senate again yesterday. A scarraph in the general appropriation provide for a mode of proceeding, which paragraph in the general appropriation bill appropriates \$27,800 for interest on the several amounts, running back as far as 1873, taken from the School Fund, and on 1873, taken from the school Fund, and on lation, cannot be surrendered, but must be none of which a cent's interest has been paid. The above figures are those taken from the special report made by the Anditor to the House a few days ago, and represent the interest due on the several of the figure of the redemption of the paid of ef lawful money for the redemption of its sums from the time each was taken from the Fund up to the date of said special report, February 14th, 1831.

For the item of interest Senator Dawson proposed an amendment in these words: "To pay interest on the several amounts borrowed from the School Fund, from the date of each loan up to September 30, 1881 - \$32,500."

In his remarks in defense of his amend-large tender of the proposed in the remarks in defense of his amend-large tender in the several amounts to the several amounts between the several amounts bea

WASHINGTON, March 9 .- An inquest was held over the body of Harry Free-burn, the engineer of the Baltimore and Potomac Railroad Company, who died from the injuries received in the recent collision near Severn. Among the witnesses was John Roy, the conductor of the extra train. During the examination he said, "Freeburn and I had orders read over to us twice by the dispatcher in Bal-timore, and the accident was due to our carlessness. Harry is dead now, and I alone am responsible." The jory found that Freeburn came to his death by the collision, which occurred through the negligence of said Freeburn, engineer, and John Roy, conductor, of the south-bound test.

Rich Men Left Opt.

WASHINGTON, March 8 .- In speaking of the financial standing of the new Cabinet, the general verdict here is that it is commatter of dollars and cents. Haves had a poor Cabinet, Grant's Secretary of State alone being able to buy the worldly possessions of the whole lot. The Cabinet of President Garfield, however, is even poorer than that of the last administration. Garfield, however, is nimself poor, his intimate friends say not worth over \$20,000 if every item of his property was brought to the auction block. His Secretary of the Treesury. Windom, is rated as worth about \$100,000, and is one of the wealthiest one is MacVeagh, but he is by no means a millionaire. Blaine is well off, but not very rich. The rest, Kirkwood, James, Hunt and Lincoin, are all poor men. James has nothing but his salary as Postmaster in New York thunt has no property, and Kirkwood is in very moderate circumstances. The two "well-to-do" men are Blaine and McVeagh. The cry that the rich men are gobbling the Government is strikingly controverted by the financial status of the present administration. There are a hundred alone being able to buy the worldly present administration. There are a hun-dred men in New York City who are worth more than Garfield and his entire Cabinet, with a lot of other leading officials

To have a lot of millionaires in the Dabinet would be very pleasant for society people in Washington. The entertainments would be glorious and the late suppers greatly redound to the benefit of the resident doctors, but the effect on the ountry at large would not be wholesome

## The Ute Matter.

WASHINGTON, March 9 .- Acting Com pissioner of Indian Affairs, Indian Agent Berry, and three Uncompaghre Chiefs held a conference to-day with Secretary Kirkwood at the Interior Depart ment in relation to the selection of lands under the new treaty for the Uncom-paghre Uutes. The Indians expressed the paghre Uttes. The Indians expressed the desire to have the lands apportioned them adapted to grazing and agricultural purposes, and claimed that along the Grand river where, under the new treaty, they are to be located, there is not sufficient land of this character. After the Indians had made known their wants the conference adjourned to meet to-morrow, when it is expected the Department will be prepared to offer them assurances that in selecting the lands their wants will be satisfied.

### PINANCIAL TRANSACTIONS. Review of the Past Week's Business by

NEW YORK, March 9 .- From the Public: The exchanges at New York last week were the largest ever known, inclusive of

Nine cities out of the eighteen which report weekly show loases, and yet the aggregate is very large beand yet the aggregate is very large be cause of the heavy transactions at Boston, Philadelphia, Cincinnati, Louisville and Philadelphia, Cincinnati, Louisville and Pittsburg. Indeed the returns for the first week of the moath is chiefly notable as a showing. The severity of the interruptions at points was unprecedented, as the volume of business elsewhere was Joing on while thus interrupted. The following shows the exchanges for the week ending March 6th at the other cities, and Fabruary 20th at 82th Francisco. New ending March 5th at the other cities, and February 26th at 8an Francisco: New York, \$1,241,050,579; Boston, \$83,849,374; Philadelphia, \$50,690,480; Chicago, \$38,-550,763; Cincinnati, \$10,455,409, Baltimore, \$10,088,075; St. Louis, \$15,748,332; New Orleans, \$9,182,164; Louisville, \$8,850,031; San Francisco, \$7,880,114; Pittaburgh, \$0,-382,055; Malwaukee, 5,720,182; Providence, 4,418,700; Kansas City, \$1,878,300; Indi-sanapolis, \$2,130,255; Oleveland, \$1,801,-000; Hartford, \$1,482,509; New Haven, \$1,-071,701; total, \$1,523,014, 207; outside New York, \$281,063,688. The value of the business in February was surprisingly layorably weather, which prevented over a great part of the northweatern States though the transactions last year were enormous in February and the prices have since declined materially. The returns do not show the important losses at any point, nor is there a single city at which point, nor is there a single city at which the decrease in the exchanges has been as large as the decline in prices. The increase of the exchange at New York in February was largely due, as it was in January, to the extraordinary transactions in the stock market. The sales on the days corresponding with the month of February for the exchanges amounted to 11,945,677 shares sgaint 12,340,906 shares in the longer month of January. Deducting double their value the remaining in the exchanges were about \$2,560,906,380 he exchanges were about \$2,560,906,389 n February against \$2,829,528,142 in

itizens Confronted by a Rapid Appreci CHICAGO, March 9 .- The rapid appre iation of rents is getting to be a serious natter with tenants. They find themselves onfronted with the double dilemms of ery much higher prices for their present ecation and the impossibility of doing petter by moving, while many who have brown up their leases because of the dvance by the landlords, find themselves inable to secure any new quarters whatver. This condition of affairs arises, according to real estate man, not from the scarcity of building operations during the east year for very many very large and

ommodious buildings have been erected what is true of rents in the business section of the city is also true of residence tents, and the letof May will witness such a scramble for houses as was never seen

ers before.

It now looks as though many peole would be entirely homeless, alcough according to the building statistics recently telegraphed, over 5,000 residences ing question by Harland to Mundella, were erected during 1880 in Chicago. Vice-President of the Council, which was Horm \$30 to \$80 per month, are now bring; induced the Liverpool provision trade to the story of the story ionate rates are being fixed in some cases, In the business section the advance ranges from fifteen to flity per cent. One case is known in which a furniture firm which last year paid \$5,000, was asked to pay \$9,000 for a three years' lease, and after casting about and finding no other building available, was compelled to accede to the terms. In another instance a whole-sale firm on State street, whose rent had been \$2,500, will pay 5,500 the coming year. Agents as well as rentees and owners consider this a genuine rise in rent; not an engineered scare, and it may be stated that the business prosperity and growing activity in every branch of industry is a further warrant for the advance.
